**ENVIRONMENTAL
and
ENERGY POLICY**

ENVIRONMENTAL and ENERGY POLICY

We consider using energy resources in the most efficient way possible, selecting technologies that provide energy savings, monitoring and continuously improving the environmental and energy performance arising from our operations, protecting the environment, ensuring full compliance with the laws and preventing pollution, reducing and sorting the waste material generated as a result of our operations primarily at the source, recovering the same with recycling and disposing of the same using the most appropriate method as the principles on which our Environmental and Energy Policy is based, and implement this policy with the help of all our employees.

Within the framework of our Environmental and Energy Policy, we commit to:

- Ensure full compliance with applicable codes and laws, continuously improve our environmental and energy performance and energy efficiency,
- Reduce and prevent air and water pollution, leakages, spills and noise to the fullest extent possible,
- Reduce the use of packaging, ensure that the packaging materials are recyclable and reuse them,
- Ensure that energy and materials are used efficiently, reduce environmental aspects, continuously enhance our environmental and energy performance,
- Take all necessary measures to prevent harm to environment and loss of energy,
- Provide the necessary training and information to our employees to raise awareness regarding efficiency for the purpose of ensuring energy efficiency and improving environmental consciousness,
- Keep under control and minimize Environmental Impacts related to new processes and operations to be developed or new products to be manufactured in the future, prefer energy-efficient technologies and applications,
- Conduct energy efficiency projects for the efficient use of energy and engage in activities that will increase the use of renewable energy resources,
- Minimize wastes, prevent pollution at the source, use energy efficiently and reduce the negative impact of our operations on the environment,
- Implement our policy in an effective manner with the support of the necessary financial and structural conditions and using an appropriate management system,
- Ensure that all of our businesses conduct their operations in an environmentally friendly and energy-conscious manner,
- Conduct our business in cooperation with our stakeholders, suppliers, subcontractors and all of our employees to ensure our mutual interests,
- Ensure that natural resources and energy are used efficiently, renewable energy sources constitute a larger share of the total energy consumption,
- Continuously improve, document, communicate to all departments, review and update our environmental and energy management systems with periodic inspections,
- As the top management, provide all the information and resources necessary to achieve our energy targets and objectives.

This policy applies to the following group companies of Alplas.
- Acron Elektronik Sanayi ve Tic A.Ş
